

# ASTRONOMIC TOUR

This astronomic tour wants to develop the concept of the history of the universe from Big Bang until humankind and consciousness birth. Using the development of new visual, auditory and transfer of information techniques. The passenger will live a unique and high quality experience. Starting with a cosmological speech, the passenger could discover where we are in the universe and how everything started. They will also learn the cosmic process which led to be how it is today and the potential futures of our civilization and universe. Then, they will observe the night sky to the naked eye while they will be told about the importance of the astronomy and will observe the

fascinating characteristics of the main visible objects at first sight. Further on, they will observe via telescope, the most prominent celestial objects in the night. In this part of the tour, they could appreciate with more details the beauty of the outer space. Before going back to the hotel, they will enjoy a hot beverage (various teas or coffee). During the tour, the passenger could enjoy a friendly atmosphere accompanied by space music to inspire us to a sensation and learning state of mind.
