

# OSORNO VOLCANO

Come with us to enjoy the adventurous climb of the Lakes region touristic symbol. To reach Osorno volcano, we have to go through Llanquihue Lake southern shore for 50 minutes. On our way, we could see beautiful fields that decorate the lake scenery. Arriving at the volcano's foothills we will discover Ensenada village where we will start to hike to enter Vicente Pérez Rosales National Park. During the ascent we will stop to appreciate the panoramic view on Río Petrohué valley and will see the extinct crater of the volcano. Another place where we will stop is a viewpoint from which we could see Llanquihue Lake

in all its dimension. At the end of the path, we will arrive at the ski resort with its cafeteria. We could also access to chairlifts (not included) that will allow us to observe the stunning landscape.
