

# COUSIÑO MACUL

We will enjoy a tour through western Santiago to arrive to Cousiño Macul vineyard, the oldest one in Chile with a secular tradition in viticulture process. We will visit one of the oldest and most important cellar in Chile, built in 1872, 6 meters underground by French architects. In there is kept the private wine collection of the family with bottles from 1927. While we will be told the production processes and vineyard history, we will taste 4 different wines: 2 white wines and 2 gran reserve wine. The wine tasting is led by a sommelier and you will get a wine glass as a gift.
